About Otonomo

Otonomo fuels a data ecosystem of OEMs, fleets, and more than 100 service providers spanning the transportation, mobility and automotive industries. Our platform securely ingests more than 4 billion data points per day globally from over 40 million vehicles licensed on the platform and massive amounts of mobility demand data from multimodal sources, then reshapes and enriches it, to accelerate time to market for new services that improve the mobility and transportation experience. We provide deeper visibility and actionable insights to empower strategic data-driven decisions - taking the guesswork out of mobility and transportation planning, deployment and operations. Privacy by design and neutrality are at the core of our platform, which enables GDPR, CCPA, and other privacy-regulation-compliant solutions using both personal and aggregate data. Use cases include emergency services, mapping, traffic management, EV management, subscription-based services, micro-mobility, parking, predictive maintenance, insurance, media, in-vehicle services, and dozens of smart city solutions. Otonomo has an R&D center in Israel and a presence in the United States and Europe.
